#### **5.1. PUBLIC QUESTION TIME**

Mrs. Kaye Crafter attended public question time and posed the following questions;

Question: There has been a large increase of heavy traffic on the Koolynaobbing Road

leading to the road deteriorating visibly every day. Is there anything being done about the situation, and are there any plans to widen the road towards Koolyanobbing from where the road has already been widened?

Answer:

The Shire President referred the question to the Executive Manager Infrastructure, the EMI confirmed that Shire is aware of the traffic and consequences of the traffic on the Koolyanobbing Road and is meeting with MRL next month to discuss the issues raised and work towards a solution. Currently there is no immediate plan for the Shire to widen the road towards Koolyanobbing, however, it may be considered should continued third party use result in a requirement to upgrade the road, at their cost.

Question Can the Shire consider placing some type of CCTV in the Museum due to a recent incident where a volunteer's purse was stolen from the front desk while they were elsewhere in the building.

Answer

The Shire President referred the question to the Chief Executive Officer, the CEO confirmed that Shire staff would investigate CCTV options in the Museum, however was unsure what shape it would take as the building is heritage listed and the Shire is limited on what they can do within the building.

Attachments L4597 – Barto Gold Mining January 2024 Licence

L4597 – Licence Amendment

L4597 – License Amendment supporting documentation

#### **Purpose of Report**

For Council to consider a response to the Department of Energy Mines, Industry and Safety (DMIRS) regarding a request from Barto Gold Mining Pty Ltd for a licence amendment for L4597/1988/14 under Division 3 Part V of the Environmental Protection Act 1986 (EP Act) at Southern Cross Operations.

#### **Background**

The application includes:

- Addition of mining tenement M77/133 to prescribed premises boundary;
- Construction and operation of additional dewatering pipelines;
- Additional mine dewater discharge locations; and
- Reinstatement of former dewater pipelines.

Licence L4597/1988/14 currently authorises Barto for Prescribed Premise Category 6 'Mine Dewatering' for dewatering to be discharged to Marvel Loch Pit, Glendower Pit, Jacoletti Pit, Nevoria Pit, Fraser's Pit, Triad Pit, Polaris South Pit, Axehandle Pit, Transvaal complex and the Yilgarn Star Pit.

Barto intends to recommence mining via open pit methods at the historic Achilles open pit in early 2024. A detailed hydrological assessment was completed in 2023, and it determined that groundwater is likely to be encountered in the final few months of mining at Achilles. Barto seeks to construct a dewatering pipeline from Achilles to the adjacent Axehandle pit ahead of the possibility of hitting the water.

Barto is also mining via open pit methods in the Rhapsody pit at its Windmills site. Groundwater may be encountered in the final stages of mining the Rhapsody open pit. To allow safe, stable mining, Barto seeks approval for the construction of a pipeline from Rhapsody to

the adjacent Redox pit for discharge should volumes be too significant to be managed in its approved Windmills Turkeys Nest. This Turkey Nest and pipeline from the Windmills pit was approved under licence amendment DER2014/0008878-1-7 on the 13/05/2022.

This licence amendment application seeks approval to add the Achilles to Axehandle pipeline, the Rhapsody to Windmills/Redox pipeline, tenement M77/133 to the prescribed premise boundary and the inclusion of the Cornishman complex pits, Ruapehu, Maori Lass, Achilles complex pits, GVG, Hercules, Grand National, Southern Star, Haris Find, Windmills, Rhapsody, and Redox Pits are approved discharge locations.

The overall dewatering discharge rate for SXO will remain within the current licence limit (6,000,000 tonnes per annual period).

Attachment 2 – 2024/2025 Rating Objects & Reasons

#### **Purpose of Report**

Council is requested to endorse the 2024/2025 Rating Strategy & Objects & Reasons.

#### **Background**

It is proposed to impose Differential Rates for the year ending 30<sup>th</sup> June 2024 under the various rating categories within the Shire of Yilgarn.

Under Section 6.33 (3) of the Local Government Act 1995, a Local Government is not, without the approval of the Minister, to impose a differential general rate which is more than twice the lowest differential general rate imposed by it.

With the Differential General Rates being proposed in the 2024/2025 Rating Strategy and Objects & Reasons, Council falls under the umbrella of this section of the Act. Note however that it is only applicable to UV Mining. Accordingly, Ministerial approval is required and the proposal to impose this rate must be advertised for a period of not less than 21 days with any submissions received subsequently being presented to Council for consideration.

#### Comment

The Rates in the dollar being recommended are a result of efficiency measures being implemented over the previous few years. As a result of these measures, Council has significantly reduced the burden on its Ratepayers, in some categories, to the effect of as much as a 61% reduction in the rate in the dollar.

Due to the current economic uncertainties, it will be proposed to recommend that a small 2.5% increase in the Rate in the Dollar and no increase in the minimums be proposed for the 2024/25 financial year.

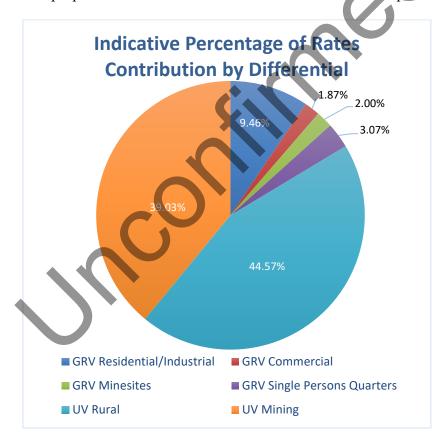

#### 2024/2025 Proposed Differential Rates

The proposed Differential Rate for each rating category are as follows:

	Rate – Cents in	Minimum
Land Category	the Dollar	<b>Payment</b>
GRV - Residential/Industrial	11.9201	\$600
GRV - Commercial	8.3912	\$450
GRV - Minesites	16.7821	\$450
GRV -Single Persons Quarters	16.7821	\$450
UV - Rural	1.2813	\$450
UV - Mining	15.2914	\$450

The proposed Rates in the dollar for 2024/2025 represents a 2.5% increase over those imposed in 2023/2024. It is proposed to leave the minimums the same as those imposed in 2023/2024.

The recommended Rate in the dollar increase of 2.5% is less than the WA Local Government Cost Index (WALGCI) forecast for 2024/25 of 2.6% and December 2023 Perth CPI of 3.6%. The WALGCI is similar in principle to the Consumer Price Index (CPI) but is weighted towards expenditure types more relevant to Local Governments.

The CPI is based on actual household expenditure data, which is principally derived from the Household Expenditure Survey conducted by the ABS and includes expenditure on areas such

as food and non-alcoholic and alcoholic beverages, tobacco products and clothing & footwear; all of which are not expenditure areas for a Local Government.

The WALGCI is a combination of certain cost items from the CPI and others from the General Construction Index WA (GCIWA). The WALGCI offers an indication of those changes in the WA economy that relate more closely to the functions of Local Government.

#### **Background**

Lot 607, Bullfinch-Evanston Rd, Bullfinch was owned by J Nicoletti from 2004 through to July 2021. In December 2021 a notification from Landgate was received indicating a change of classification, from Residential to Commercial and a change of ownership to J M Caratti.

Further follow-up on the outstanding rates revealed that J M Caratti did not actually own the property as the Certificate of Title has the Department of Planning, Lands and Heritage as the responsible agency and the land status as Unallocated Crown Land.

#### **Comment**

Unallocated Crown Land is non ratable and no collection action allowed under the Local Government Act 1995 is possible as the Act does not bind the Crown

To consider the modified Shire of Yilgarn 2024/25 – 2028/29 Corporate Business.

#### **Background**

The 2024/25 – 2028/29 Corporate Business Plan (CBP) includes a service delivery plan comprising 35 key services provided by Council. Each of these key services includes links to Councils Strategic Community Plan, a background on the service to be provided, expected service level and any anticipated issues that may impact the service being provided and any significant actions necessary to provide/maintain the expected service level or required due to statutory obligations.

The CBP also includes the projected operational income / expenditure necessary to provide the service for the coming budget year and estimates for the next four years.

#### Comment

The CBP is based on the current year's budget figures and a long-term historical average (adjusted for any anomalous instances) for the subsequent four years. An anticipated year on year Local Government Cost Index (LGCI) increase is then factored in. For the presented CBP the LGCI rate used is 3.9% as provided by WALGA in their December 2023 economic forecast.

# **Purpose of Report**

For Council to consider adopting the revised Long-Term Financial Plan 2024/25 – 2033/34.

#### **Background**

In February 2009, the Minister for Local Government announced a package of wide-ranging local government reform strategies that were aimed at achieving greater capacity for local government to better plan, manage and deliver services to their communities with a focus on social, environmental, and economic sustainability.

One of the requirements was to develop and review a long-term financial plan (LTFP) that is a ten-year rolling plan that informs the Corporate Business Plan to activate Strategic Community Plan priorities. From these planning processes, annual budgets that are aligned with the strategic objectives can be developed.

#### **Comment**

The operating income and expenditure aspects of the LTFP are primarily developed utilising a CPI increase of 4.5% for the life of the plan, however the historic percentage increase/decrease of a given income or expense item could be utilised if appropriate. All estimates can be manually adjusted were necessary to reflect a realistic valuation for the specific income or expenditure item.

Rate income is calculated utilising a 2.5% increase for the first 5 years with the remaining 5 years being calculated on a CPI Increase.

The Forward Capital Works aspect of the LTFP has been developed in consultation with the senior management team and with Councils Asset Management Officer. It should be noted that many aspects of the proposed forward capital works are currently still under review and as such are estimations. It is anticipated that accurate forward capital works information will be available for 2024/25 onwards.

Attachments Plant Replacement Program

#### **Purpose of Report**

For Council to consider the 10 Year Plant Replacement 2022/2023 to 2033/2034 for adoption.

# **Background**

The Plant Replacement program shall ensure that the Shire's fleet of machinery and vehicles are kept fully applicable, to meet the Shire's budgeted construction and maintenance programmes for all assets. This shall involve consideration of new technology, processes and materials as well as the ongoing balance of the Shire's ownership versus external hire of its machinery and vehicle needs.

The development of a ten-year plant replacement plan is important, as it ensures that the cost of new purchases, are spread over the life of the plan. It also ensures that Council's fleet remains relevant and in good working condition, thereby minimising maintenance costs and lost productivity due to machine breakdowns.

#### Comment

Asset lifecycle management (ALM) is a crucial process that shire employs to ensure the smooth operation and longevity of their valuable assets.

Why asset lifecycle management matters. Effective ALM maximizes asset value, minimizes risks, and optimizes resource utilization. By strategically managing assets the Shire is able to enhance operational efficiency to achieve long-term sustainability.

The asset lifecycle refers to the, end-to-end process an asset undergoes from acquisition to disposal. Organizations monitor asset health using methods like real-time performance data and preventive maintenance.

# **Stages of Asset Lifecycle Management**

**Planning:** staff assess the need for an asset, its projected value, and associated risks. Risks, include likelihood of failure, and resource availability. Valuation involves gauging an asset's overall value, considering its useful life and projected performance.

**Acquisition:** This phase involves procuring the asset based on the planning stage. Proper acquisition ensures alignment with the Shire's goals and minimizes risks.

**Operation and Maintenance:** During the asset's useful life, it is operated, maintained, and monitored. Regular maintenance reduces costs, extends asset life, and <u>prevents unplanned</u> downtime.

**Disposal:** When an asset reaches the end of its useful life, it is disposed of appropriately. Proper disposal ensures compliance with regulations

The 2024/2025 plant replacement does not introduce any extra assets into the fleet. Four light trucks were preordered during 2023/2024 financial year due to long delivery times.

The new 8x4 Mack truck has left the factory and on its way to Blackmans, to build the new side tipping body. Hopefully this truck will be completed before the end of 2023/2024 financial year.

# Proposed replacements for the 2024/2025

- 1. **Grader:** The existing 2017 John Deere grader will be 8 years old and within the upper limit of primary production hours. The machine will be high risk of major component failure.
- 2. **Small tipper:** Parks and gardens, this unit is due for replacement. All the best asset management lifecycle data indicates a five-year replacement interval for light trucks.
- **3. Tandem Dolly:** This tandem dolly was purchased second hand in 1999. This unit is below average condition. The Shire requires a second good quality dolly when running two 8x4 trucks with side tipping dog trailers.
- **4. Road maintenance truck:** Preordered in 2023/2024 due to supply issues. This truck is used every day for installing signage, bitumen patching, and general repairs. Unit will include a hydraulic auger.
- 5. **Light trucks:** two 4x4 personnel carriers, one in construction and one in grader maintenance. These are 6.5 tonne, 4x4 trucks fitted with toolboxes and Kevrek cranes.

- 6. **Light fleet vehicle:** The Works Supervisor utility is the only light vehicle due for replacement.
- 7. **Water tank:** This is a slip in water tank which fits inside the 8x4 tipper body. This allows for quick removal when the truck is needed as a tipper.
- 8. **Ride on mower:** This replaces an existing unit. Maintenance and repairs increase rapidly once these machines start to age.

# **Statutory Environment**

The development and adoption of the 10 Year Plant Replacement Program forms a component of the Council obligation to produce a plan for the future under Section 5.56 (1) of the Local Government Act, 1995.

# **Strategic Implications**

The Plant Replacement shall ensure that the Shire's fleet of machinery and vehicles are kept fully applicable, to meet the Shire's budgeted construction and maintenance programmes for all assets. This shall involve consideration of new technology, processes and materials as well as the ongoing balance of the Shire's ownership versus external hire of its machinery and vehicle needs.

# **Policy Implications**

"Staff Policy No 7.12 Motor Vehicle Replacement and Vehicle Standard and Accessories"

# **Financial Implications**

The 10 years Plant Replacement program will be included in the Shire's long-term financial plan.
